OUR HEART

Mission

We love connecting people and places, creating value for our shareholders, employees, customers and society whilst shaping our future in a sustainable way.

Vision

Together we will be the leading LCC in all the markets we choose to serve by unlocking our full potential through Vueling Transform.

Values

- Make it happen
- Make it better
- Make it safe
- Make it customer-oriented
- Make it cost-focused
- ... And win together

INNOVATION

vueling

PRESS KIT 2023

INNOVATION

Vueling, a digital native company

vueling TRANSFORM

Agile Culture

VY Agile framework is about business and tech teams working together, ensuring IT strategy integrates with enterprise strategy to drive opportunity through IT capabilities.

Nearshore Talent (ADC)

Two Agile Development Centers were designed in order to create a collaborative and multifunctional environment to promote open innovation and adapted to the growth plans.

Tech foundations

We have invested strongly in our tech foundations from both the infrastructure and software engineering perspective to move towards cloud first, microservices and continuous release solutions.

Cybersecurity as a principle

Putting Cybersecurity in the center of all what we do from the very beginning of the development lifecycle, to keep the platform stable and resilient.

From now to the future

Working Innovation from different horizons with the aim of improving the experience of our customers today while preparing the solutions for the future challenges.

SUSTAINABILITY

vueling^o

PRESS KIT 2023

SUSTAINABILITY

Caring for the environment

We know that we can only achieve our goal of becoming Europe's leading low-cost airline in terms of customer experience if we work to offer real and urgent solutions to help reduce global warming.

VUELING'S SUSTAINABILITY GOALS

Sustainable Development Goals

The UN's Sustainable Development Goals are an essential part of our business strategy, our daily operations and our company culture.

As part of IAG, Vueling has pledged to reach net-zero CO₂ emissions by 2050

For more than a decade, IAG has been at the forefront of the aviation sector's climate change response.

SUSTAINABILITY

Reducing our environmental impact

Improving more efficient operations

As part of the Single European Sky programme, we are working to improve how the airspace works and to reduce fuel consumption (and emissions) by up to 10%.

- Better route planning
- Optimisation of taxiing time
- Establishing the optimal flight speed and altitude

Use of sustainable aviation fuel (SAF)

SAF is an alternative fuel produced from waste and other sustainable raw materials, as well as from CO₂, and which the existing plane's engines can use.

- SAF enables us to reduce CO₂ emissions by up to 80% compared to traditional fuel.
- We aim to operate 10% of our flights with SAF by 2030, which is more than the mandatory 2% established in Europe.
- Vueling is the first LCC in Europe to offer its customers the option of providing SAF on the day of the flight thanks to the Avikor service. Vueling doubles the volume of SAF provided by passengers.

Fleet renewal and weight reduction

25% of our fleet will be new generation by 2023, and 100% by 2030.

- The new Airbus 320neo has enabled us to reduce CO₂ per passenger by 18%, and noise emissions by 50%.
- We have reduced the weight of aircraft in order to cut CO₂ emissions even further.

Recycling and no plastic on board

Our goal is to reduce the amount of waste we generate, and also to improve the recycling process.

- We use recyclable cups and cutlery, both on board our planes and in our offices. And we offer €0.50 off hot drinks if customers bring their own cup on board!
- We separate waste on board and therefore reduce by 43.21% the amount of common waste

CSR

vueling^o

PRESS KIT 2023

CSR

Vueling, for the people

At Vueling, we spearhead various initiatives to help improve our society, with a particular emphasis on providing support for children. We have in place a fundraising mechanism for charitable causes which, thanks to the generosity of our customers and employees, has so far been earmarked for Hospital Sant Joan de Déu, Hospital Bambino Gesù and Save the Children.

CHILDHOOD

Contribute to the development of the most vulnerable children. Actively promote all the areas that can help to develop this sector of society.

WOMEN

Promote equality between men and women by giving support to actions that foment female empowerment.

RESEARCH

Collaborate and invest with associations and events that invest in improving the well-being of our near Society & fight against climate change.

Vueling, leader in the transfer of organs carried out by commercial Airlines
